

VideoTizer®

Tapeless Access and Playback to 100s of Video Clips...Instantly!

Present video programs 100 times faster than using video tape!

The VideoTizer lets you record video from any source and play it back without any video tape! It's hassle-free because you can get to any video clip less than a second!

Imagine never having to fast-forward or rewind to find the spot you want...never having to search through tape after tape to locate the right program.

Access any video program in less than one second!

VideoTizer gives you tapeless access to hundreds of video programs in less than a second! No more ejecting tapes and reloading new ones to play back video programs. Select the program from our My Programs screen on the VideoTizer and instantly you're there!

Why use video tape...when you could instantly access your video content?

Capture all of your videotape and classroom camera footage into the VideoTizer tapeless Video Recorder by simply pressing a button on a remote. This can be done live while you teach, or from a wide variety of recorded sources at a later time. Any source that generates audio or video signals can easily be recorded into the VideoTizer.

Access any program in less than a second without rewinding and fast forwarding!

Once a program has been captured you can name it whatever you'd like. You can even attach a description to it so it's easier to find later. Using the My Programs screen, simply scroll through to the program and select with the VideoTizer remote. Play it again and again without loading and searching through tape!

How to Play a video program back without being there...Read Below...

VideoTizer lets you set up simple scheduling events to record or playback a program for use at a later date or time. For example, if you want to record a program that's on at 7 pm on Tuesday evening, simply click a button to schedule recording, and the VideoTizer will automatically record it for you. Then, schedule that program to automatically play back on Wednesday morning at 10 am. You don't even have to be there! Advanced scheduling is also possible. Call your VideoTizer representative for more details.

No searching for your cue, VideoTizer remembers where you left off!

VideoTizer displays program information at the bottom on the screen in a progress bar called the Clip-Timeline™. The Clip-Timeline has a "Present Location Indicator" that shows you how much of the program you've already played. It also remembers where you were when you stopped and allows you to resume from the same point later on. This feature makes VideoTizer ideal for setting up lessons in a classroom, distance learning facility or even a training room, where an instructor needs to break for questions or lunch then resume afterwards.

Mark 100's of spots, then find them in less than a second!

ClipMarks™ are like bookmarks in web browsers. They allow you to mark your favorite or most-used points in a VideoTized video program. For example, if you have a full 30-minute program on volcanoes, you can ClipMark the beginning and ending points of the sections you use most frequently so you can go directly to those segments instantly!

Don't spend a dime of your budget until see a VideoTizer Web Demo!

VideoTizer is helping facilities just like yours all across the country. Places like schools, universities, access centers, broadcast and video production facilities, corporations, entertainment and government sites now have instant access and playback to hundreds of video clips, instantly!

For a live web demo call IRIS Technologies today at 800.354.4747. Ask for one of our VideoTizer Application Specialists. The call and the demo are free!
